

ECOGRID® Gabions

Welded mesh gabions from Galvan wire or triple life coated

The product

3" x 3" (76.2mm x 76.2mm) x 4mm Galvan coated (95% Zinc 5% Aluminium for up to 4 times the life of a galvanised finish) welded mesh Gabion baskets wire as per EN 10218-2.

All mesh panels used to produce our baskets are European sourced from a European supplier ISO 9001, ISO4001, OHSAS 18001 registered and conform to EN10244-2 with a tensile range of 540-770N/mm², steel grade 0.10% Carbon max, Weld shear strength minimum 75% of the tensile strength of the wire. Plastic coated units are most suitable for coastal projects.

The Gabions comply with the Department of Transport White Book specification, as detailed in section: 6.26/4, and amended August 1994.

Gabion boxes and Mattresses are made from 76.2mm x 76.2mm nominal (3" x 3") Welded Mesh, divided by diaphragms at 1 metre centres where necessary with wire diameters 3mm, 4mm or 5mm.

All mesh panels used to produce our baskets are European sourced and conform to EN10244-2:2009 (Class A) with a tensile range of 540-770N/mm², steel grade 0.10% Carbon max, Weld shear strength minimum 75% of the tensile strength of the wire. Prices include all lacing wire required for final assembly
