

A Case Study  
**Horse Walker Base**

**Project Details****Horse walker in Dorset****Client Details****Private****Contractor Details****Client/Monarch Equestrian Ltd**

We were at the Alexanders Horsebox sponsored Scope festival for showjumping this year with our trade stand. We were approached by Phil to provide a quote for a base for his proposed horsewalker in Dorset. Phil wanted a base that was environmentally friendly, kind to horses, free-draining, hard-wearing, easy to DIY fit, and most of all cost-effective! We worked out specific quantities and supplied Phil with full, delivered costings, alongside detailed fitting advice. Our team were on hand for questions throughout the installation, resulting in a delighted client who is now measuring up to do the pathways leading up to the horsewalker in EcoGrid.

Monarch carried out the work to the main walker surround and machinery, and I am sure you will agree; did an excellent job. [monarch-equestrian.co.uk](http://monarch-equestrian.co.uk)
