Own contractors

EcoGrid is ideal for temporary parking and temporary roadways due to its very nature. Each grid is only 330mm x 330mm, however when the grids are locked together in section, they stay together until such time as you want to separate them. EcoGrid comes on a pallet preassembled in 1.33 square metre sections, it is a one man task to lift off the section from the pallet, place it on the ground, lift off another and click swiftly and securely in place. One man can lay up to 100 square metres in an hour therefore for temporary parking or temporary roadways; fitting time is not the problem.

Most of our clients that have contracts to install temporary parking or temporary roadways will have either a flat deck Transit van or a flat decked 7.5 tonne vehicle. In this case, they will be able to disassemble the EcoGrid sections in larger sheets of (for example) 4 square metres so that transportation and subsequent installation is even swifter and simpler in the future. Many examples of the use of EcoGrid can be given from the school that needs to park cars on the playing fields without any long term damage; whilst commercial vehicles use the car park for building works to the event organisers, who have been given access across a field with the provision that the field is returned to the same state after. For temporary parking and temporary roadways, EcoGrid has no rival. Available in four different sizes, each pertaining to load bearing requirements, the grids can be filled or left unfilled dependent upon the required ease of disassembly.

No need for clips, pins, or bolts; the patented locking system for EcoGrid makes assembly the easiest thing in the world, dismantling of a site is also easy. By placing a round bar under the leading edge of the grids and walking firmly on the raised edge; the grids clip apart without damage, ready for the next use. Free draining, cost-effective, strong and made from completely recycled materials... What better product is on the market for your temporary parking or temporary roadway?
