

A Case Study

# Classic Horse Arena

Equestrian Surfaces were contacted to provide a free draining, dressage arena for Classic Dressage Ltd at Glebe Farm in Warwickshire. The installation work was carried out to their usual very high standard and completed in a short period of time.

The 60m x 20m outdoor arena is slightly different to other arenas as it is the first in the UK to be built on our new EquiGrid system in conjunction with EcoGrid Limited.

This is a revolutionary system which is the best seller in America, Canada and Europe.

The system is designed specifically for the welfare of the horse, the Grid system flexes under pressure therefore reducing the shock and impact on the lower limbs when riding.

The arena is finished with their Cushion Track Classic surface, a favourite within the dressage fraternity, clients such as Eilberg Dressage, Moody Dressage, Hughes Dressage, AM Dressage Ltd and Astrid Bolton Sport.

Horses all trust the Cushion Track knowing it gives them the truest, most uniform and consistent surface to train their horses on.

For more information on this system, please contact the Equestrian Surfaces office on 01282 937 054.
